CPD applications have been submitted to MMA and MyCPD for other specialties.

Too short. Too thin. Not eating well.

These are situations we see every day in primary care clinics. How can we link assessment, management, and parent counselling into a practical approach that fits real clinic work?

This IMFeD webinar brings the recently launched “*Growth Faltering in Children: A Practical Guide in Primary Care*” into daily practice through focused talks and interactive case discussions. Participants will explore how to approach a stunted child, an underweight child, a child with poor feeding practices and how to communicate clearly with parents about growth and feeding.

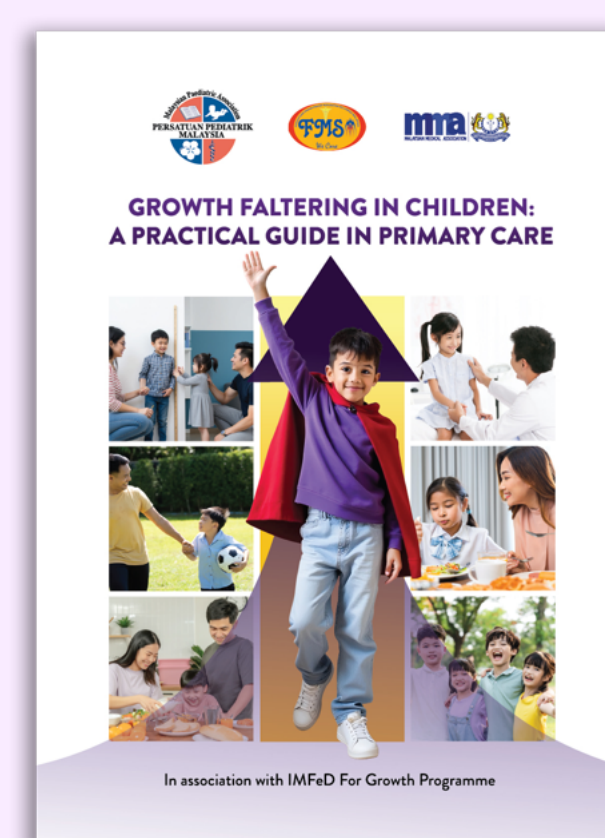

Register now to explore the guidebook’s key recommendations, clinical considerations and practical strategies for managing growth and feeding issues in primary care!

FOR HEALTHCARE PROFESSIONALS ONLY

IMFeD For Growth is a programme by the Malaysian Paediatric Association (MPA) dedicated to support healthcare professionals in optimising child growth and nutrition. The programme provides structured training through our online course and video lectures, alongside practical clinical resources including guidebooks and counselling aids. IMFeD also develops parent education materials that healthcare providers can use to support and guide families in daily practice. Learn more at <http://www.imfed.my/>
